Drive Free

Traditional mic has short distance, single direction, high center of gravity, large volume, and needs multiple combinations to meet the needs, occupy office space resources, and speak to the microphone to have a good enough effect.

Traditional Microphone

Omni-directional Microphone

360 degree all-direction pickup, 3.0 meters pickup distance, no need to speak to the microphone, high sensitivity, good sound quality, high voice clarity, and compact volume, almost takes up no space, as long as one can meet the basic meeting needs of 4-8 people.

Gripping comfort proportion coordinates golden scale size, comfortable grip, easy to carry without occupying space, easy to put into business bags.

Light and Compact

Approximately 163g

Diameter 70mm

## Anti-skid Bottom

High-quality silicone pad can effectively reduce noise and prevent skid.

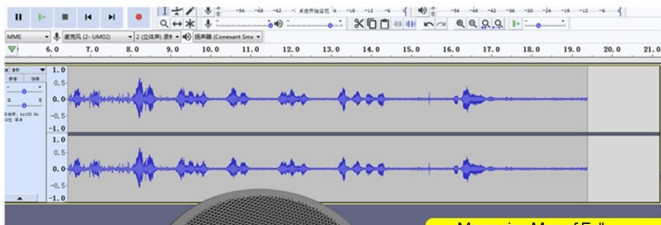

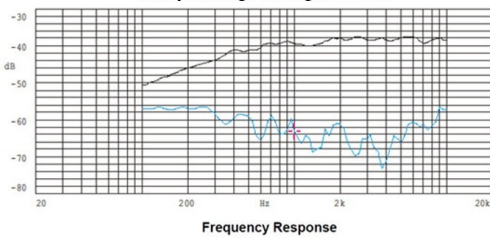

Warm Tip:  
When used, tear off the bottom protective film,  
the anti-skid effect will be better.
